PROFESSIONAL SUMMARY

Results-driven Senior Business Analyst with over 7 years of experience bridging the gap between business needs and technical solutions, with a recent focus on enterprise solutions. Adept at leading cross-functional teams to deliver impactful projects, including complex integrations. Expertise in stakeholder management, requirements elicitation, and data-driven decision-making to enhance user experiences and drive operational efficiency. Known for ability to communicate technical insights to non-technical audiences and navigate competing priorities to meet stakeholder goals.

TECHNICAL SKILLS

Advanced SQL, JIRA, Confluence, Excel, MS Visio, CRM Systems, SnagIt, PowerBI, Tableau, SharePoint, Draw.io, Salesforce

PROFESSIONAL EXPERIENCE

Uber technologies | Philadelphia, PA   **(12/2022 - Present)**
  Senior Business Analyst (Contractor)

- Collaborate independently with business stakeholders and various leaders to define processes, identify gaps, and map out areas for growth in operational efficiency.

- Work with users to translate functional and non-functional requirements into actionable application and operational deliverables, including user stories, acceptance criteria, and process flows, reducing development rework by 20%.

- Develop and maintain comprehensive business process documentation—including policies, procedures, user guides, and job aids—resulting in a 30% reduction in training time for new users.

- Partner with project managers to track and manage Agile-based SDLC projects, ensuring on-time delivery for 10+ initiatives and achieving a 95% stakeholder satisfaction rate.

- Prepare detailed reports, presentations, modeling documentation and briefing materials as needed for presentations and sharing technical knowledge to business leaders involved.

- Facilitate requirements-gathering meetings with cross-functional teams, successfully identifying critical business needs that resulted in a 20% increase in operational efficiency.

- Conduct user acceptance tests (UAT) to identify bottlenecks and defects, reducing post-production issues by 35% and saving an estimated $200K annually in potential rework costs.

- Provide detailed process improvement recommendations that streamline workflows and support the implementation of application enhancements, increasing productivity by 18% across departments.
